The Number Jumble

Cover Page Footnote

This poem is available in The Angle: http://fisherpub.sjfc.edu/angle/vol2002/iss2/10
My favorite numbers are 1, 6, and 7.
I like them any way you put them together.
For example, why don’t we make it 7, 1, and 6?
It just seems so natural, doesn’t it?
Especially in this area
We could almost use it as a code of sorts.
To let people know that this is where we are from.

Numbers that I don’t like are 5 and 8.
I especially don’t like them when one is doubled.
For example, let’s make it 5, 8, and 5.
It just doesn’t work for me, it has no representation.
The numbers are too high, and they are just different.
Wondering what I’m talking about?
Look me up in the new phone book and you’ll understand.
Change isn’t always a good thing.
